### SUMMARY

Highly motivated and dedicated developer seeking an opportunity to utilize my technical skills and contribute to the success of a dynamic software development team and organization.

### TECHNICAL SKILLS

- HTML CSS
- TailwindCSS
- JavaScript
- React/NextJS
- RTK and zustand
- Node and Expressjs
- Java
- Python
- SpringBoot
- Django
- SQL
- NoSQL
- Docker
- Linux
- MongoDB
- MySQL

### PROFESSIONAL EXPERIENCE

#### Swastya.ai

July 2024 - March 2025

- Architected and developed swastya.ai LIMS platform using Next.js App Router frontend and Spring Boot backend with gRPC/Protobuf, aiming to achieve an improvement in a pathology's operational efficiency.
- Led client-side technical operations and deployment, successfully launching Swastya.ai in 5 pathology labs, ensuring seamless onboarding and integration.
- Integrated LLM-powered automation to parse vendor bills, manage inventory, and streamline procurement workflows, reducing manual processing time.
- Developed settings page that was responsible for changing tests and price lists, employees, doctors, institutes, discounts, and lab details.

#### EduCADD ThinkWORKS

March 2023 - July 2024

- Creating curriculum and taking classes for students.
- Maintaining CRM system, which was responsible for printing invoices and tracking leads and students records

### EDUCATION

#### BCA

Manipal University Jaipur

### PROJECTS

#### Ecommerce app

- Fully functional and responsive E-commerce App ( with authentication )
- Build with ReactJs, TailwindCSS, MUI, ExpressJs, and MongoDB
- <https://github.com/reo127/EcommerceDesign>

#### APISaga

- Provides different APIs for new frontend developers to learn API handling
- Provides APIs - todo, authentication, public (jokes, quotes, products)
- Build with node, ExpressJs, and MongoDB
- <https://github.com/reo127/apisaga>

### ADDITIONAL INFORMATION

- **Certifications:** Full Stack JavaScript live bootcamp (MERN).
- **Hackathon:** Ineuron offline 24 hour hackathon - build a restaurant management system
